Profile

I am a driven and adaptable Bachelor of Computing student in my third year at Belgium Campus, specializing in Software Engineering. I am currently part of a Systems Analyst learnership at FNB, where I've gained hands-on experience working with real-world enterprise systems, enhancing my understanding of both technical and business processes. I have built solid skills in Java, C#, SQL, HTML, CSS, and JavaScript, and I'm confident using tools like Git, Node.js, and Docker in agile development environments. I'm also expanding my capabilities with Python and continuously seeking opportunities to learn and apply new technologies.

hile my academic journey has included its share of challenges, these experiences have strengthened my resilience and sharpened my focus. I am actively exploring options to pursue a Master's degree in Software Engineering in future, with the goal of deepening my expertise and contributing meaningfully to the field. I bring enthusiasm, adaptability, and a growing tech stack to every project I'm involved in, and I'm eager to continue learning and growing within dynamic development teams.

Employment History

Learnership- System Analyst, FNB, Johannesburg

APRIL 2025 — PRESENT

- Looked at how the current systems worked to find ways to improve and make things run smoother.
- Worked closely with different teams to understand what was needed and helped turn those ideas into clear technical tasks.
- Helped design and add a new system that built on top of the existing one, making it more useful and efficient.
- Built and tested software that solved real business problems, always keeping the user in mind.
- Took part in agile sprints—planning, reviewing, and learning as a team along the way.

Education

Bachelor of Computing, Belgium Campus Institute of Higher Learning, Pretoria

FEBRUARY 2022 — PRESENT

Major Subjects: Software Engineering, Database Development, Linear Programming, Web Programming

I am currently pursuing my Bachelor of Computing degree, with a focus on building strong technical and problem-solving skills in areas such as software engineering, database systems, and programming. My coursework has included hands-on projects in both front-end and back-end development, as well as practical exposure to designing scalable systems that solve real-world challenges. This program has also strengthened my collaboration skills through team-based assignments and agile methodologies.

Internships

System Analyst, FNB, Johannesburg

APRIL 2025 — PRESENT
