Profile

I am a driven and adaptable Bachelor of Computing student in my 4th and final year at Belgium Campus, specializing in Software Engineering. I have recently completed a Systems Analyst learnership at FNB, where I gained hands-on experience working with real-world enterprise systems and developed a strong understanding of both technical and business processes.

I have built solid skills in Java, C#, SQL, HTML, CSS, and JavaScript, and I am confident using tools such as Git, Node.js, and Docker within agile development environments. I am also expanding my capabilities with Python and continuously seeking opportunities to learn and apply new technologies.

While my academic journey has included its share of challenges, these experiences have strengthened my resilience and sharpened my focus. I am actively exploring opportunities to pursue a Master's degree in Software Engineering in the future, with the goal of deepening my expertise and contributing meaningfully to the field.

I bring enthusiasm, adaptability, and a growing technical skill set to every project I'm involved in, and I am eager to continue learning and growing within dynamic development teams.

Employment History

Learnership- System Analyst, FNB, Johannesburg

APRIL 2025 — MARCH 2026

- Analyzed existing systems to identify improvement opportunities and enhance overall efficiency.
- Collaborated with cross-functional teams to gather requirements and translate business needs into clear technical tasks.
- Contributed to the design and implementation of system enhancements, building on existing solutions to improve functionality and performance.
- Developed and tested software solutions to address real business challenges, with a strong focus on user experience.
- Actively participated in agile sprints, including planning, reviews, and continuous team learning.

Education

Bachelor of Computing, Belgium Campus Institute of Higher Learning, Pretoria

FEBRUARY2022—PRESENT

Major Subjects: Software Engineering, Database Development, Linear Programming, Web Programming

> I am currently pursuing my Bachelor of Computing degree, with a focus on building strong technical and problem-solving skills in areas such as software engineering, database systems, and programming. My coursework has included hands-on projects in both front-end and back-end development, as well as practical exposure to designing scalable systems that solve real-world challenges. This program has also strengthened my collaboration skills through team-based assignments and agile methodologies.

Bachelor's Pass, Grey High School , Port Elizabeth

JANUARY2019—DECEMBER2021
